Lead Application Engineer (m/f/d) in Munich

Job Location
Munich

Description
For our client, a global leader in software and hardware, we are looking for the Munich office for a

Lead Application Engineer (m/f/d)

Ihre Aufgaben

You will work with some of the most technically demanding IC design development solutions and leading-edge nanometers process technologies. You are also credible to articulate solutions with an emphasis on custom IC design platform. In a customer facing and commercially sensitive working environment, you are responsible for actively assisting customers and prospective customers during:

- Sales technical campaigns and product evaluations in resolving customers design challenges while promoting solutions value added benefits
- Adoption from concept to successful deployment of design flows and associated methodologies through design environment assessments and consulting services
- Direct best practices tools knowledge sharing through standard customer support infrastructuree

Ihr Profil

- BSc required, MSc/MEng preferred in micro-electronics engineering
- Understanding of analog/mixed-signal design flow with environment, ideally using IC61 Virtuoso tooling and associated design methodologies
- Experience of UNIX environments; knowledge of SKILL, C or another computer language(s).
- Excellent problem-solving skills
- A team player who is passionate about technology but also understands business requirements

Weitere Informationen

The Application Engineer will develop skills to:

- Acquire strong technical understanding of the complete IC design/verification/implementation flow.
- Drive best practices and lessons learned from training deliveries, tool benchmarks and customer interactions back into product development and Cadence AE community
- Build understanding of customers' needs as well as Cadence competition's technology and sales strategies.
- Improve existing design methodologies and develop new methodologies leveraging ever evolving Cadence solutions and services.
